

HEADQUARTERS

Company headquarters locations rely on access to a large and diverse base of talented business professionals. Multiple studies have shown that access to a highly educated labor force within a 30-minute commute of Richardson is unsurpassed in DFW.

Then too, for company executives and customers, access by air is a key consideration. Both DFW Airport with daily non-stop flights to US and global destinations and Dallas Love Field are within less than 30 minutes of Richardson as are the private airports housing business fleets at Addison and McKinney National Airports.

Richardson is the US headquarters for a very diverse group of companies - Lennox International (HVAC systems), Fossil (watches and accessories), Blue Cross Blue Shield of Texas (health insurance), Service King (collision repair) and RealPage (software).

In addition, Richardson hosts regional and US headquarters for (Rockwell) Collins Aerospace (defense), Raytheon (defense), Fujitsu Network Communications (telecom equipment), Qorvo (semiconductor), GEICO (insurance) and Travelers (insurance).

Lennox

“Lennox moved its worldwide headquarters to Richardson in 1978, and we’ve never had a reason to look elsewhere. Talent is plentiful, the location is perfect for us, and we are within 25 minutes of two major commercial airports that provide non-stop service to about any location around the world.

John Hurst, Vice President Government Affairs and Communications, Lennox International Inc.
